SAAB

IndX2020 is an online event that brings four industry giants from East Sweden, Saab, Siemens Energy, Toyota Material Handling and Väderstad, together with the new talent of startups and small companies.

Your company, will get the chance to pitch your ideas and workshop together with the staff of the Research & Development-departments of the partner companies.

Ind δ^x

The partner companies have chosen three main areas for IndX2020

Connectivity

We want to increase our efficiency for us as well as our clients by being more connected.

How can AI/machine learning, 5G and IoT be used in our organizations?

Sustainability

It is our duty and privilege to contribute to a sustainable world.

Think circular business models, decarbonization and alternative fuels.

Autonomy

We want to use digital technology to create new value.

We are looking for solutions for Man and Machine Interaction, Robotics and Smart Vehicles.

Who can take part?

Any startup or small company with a dedicated team and innovations within the partners interest area. You can participate from anywhere in the world.

Inδ^x

How does it work?

It's all really easy. All you must do to apply is to fill out [this form](#) before the **25th of September**. Thereafter representatives from the partner companies will select ten startups out of all the applicants. You will get feedback on your application within two weeks time.

The **10 selected startups** will be called to a filming session where we will record your pitch, you will be called to a meeting between the 5th and 25th of October. If you live far away from Östergötland you will receive instructions on how to record the pitch by yourselves.

The next step is a **Digital Pitch event on October 26th** where all participating startups will display their pitch films and have q&a's along with representatives from Saab, Väderstad, Toyota Material Handling and Siemens Energy.

After the Digital Pitch event the staff at respective partner company will work up ideas from your pitches. **The goal is to collect 200 ideas.** One idea can involve several of the partner companies and several of the participating startups. 10 ideas will be selected and announced during **The Innovation week**, (week 45).

The main event is on the 9th of November where all partners and startups will workshop together to select four final ideas that will be realised into POC's (Proof of Concept).

Important dates:

25th of September- Last day to apply

5th of October- The partner companies will select 10 startups from the applicants. You will receive feedback on your application around this date

6th - 25th of October - If you are selected, you will be called to a film session to record your pitch. If you live far away you will receive instructions on how to do the recording yourselves

26th of October, 9 am - 15 pm - Online Pitch Event

2th of November- The partner companies will select ideas

Innovation Week (w. 45)- The selected ideas will be announced

9th of November - Our main event where you workshop around your ideas and finally four POC ´s are chosen.
